Air Pollution in Germany

Finn Dummke, Jonas Schaaf, Lennart Klose, Lasse Ehrhorn

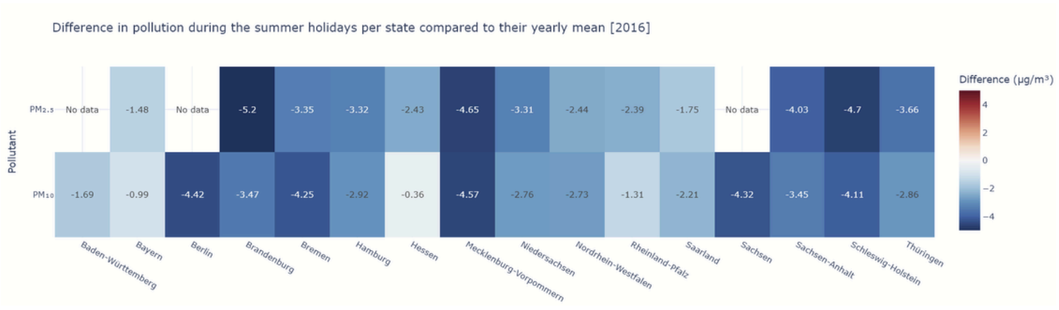
Christian-Albrechts-Universität zu Kiel

About our data

Primarily we acquired our data through the Umweltbundestamt (UBA), which provides federal data about pollution for Germany. With the help of additional weather data from open-Meteo and data about other countries from openaq, we matched the attributes when applicable and created mean averages for daily, monthly and yearly data to facilitate different types of comparisons.

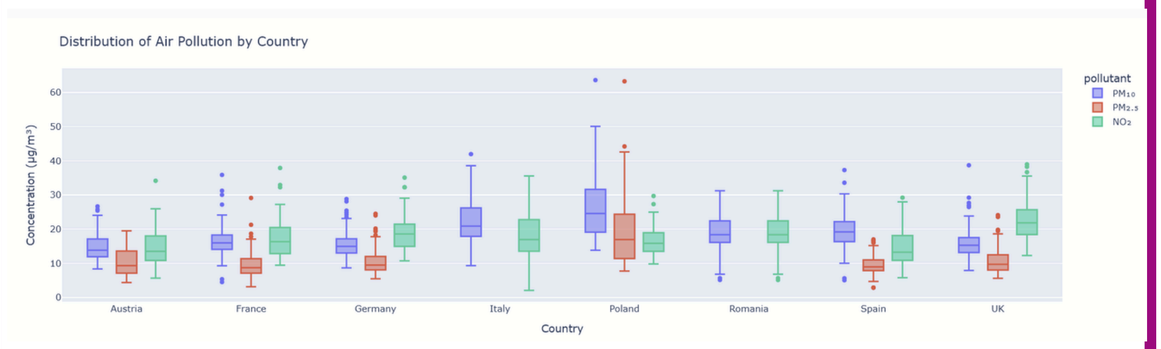
Effect of the Summer School Holidays on Pollution

The difference in pollution during the summer holidays



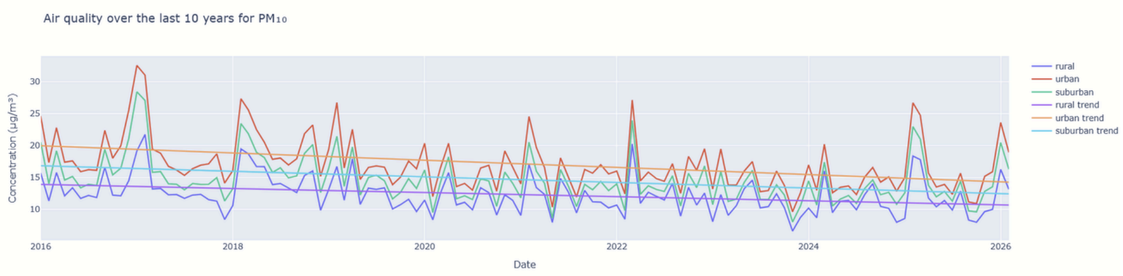
Air Pollution in different Countries

Comparing distribution of pollutants by country



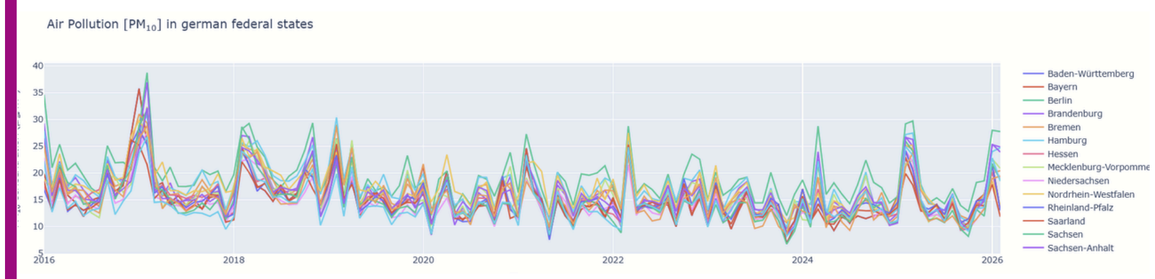
Variation based on Location

Rural, urban and suburban areas compared



Different German States

PM_{10} concentration by state



Seasonal Analysis

Comparison of different seasons in Germany

Pollution during New Years

Comparing the polution in January after New Years
